繁花拉绒系列

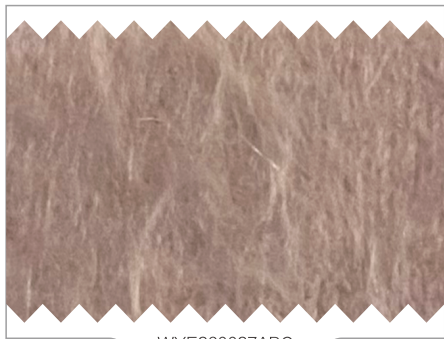

3/26NM
100%CASHMERE

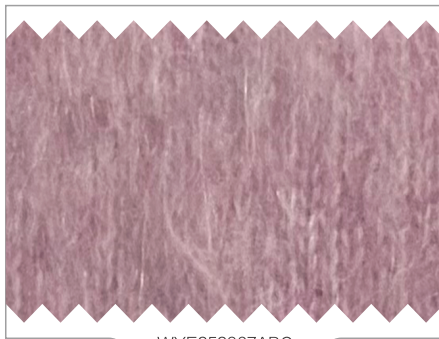

3股花纱色彩更为丰富有层次，采用拉绒工艺，轻柔唤醒羊绒纤维的自然蓬松感。
成品触感如云朵般极致柔软、轻盈亲肤。

The three-ply yarn features more vibrant and layered colors,
employing a plush-knitting technique to gently restore the natural fluffiness of cashmere fibers.

The finished product boasts an unparalleled softness,
Lightweight texture, and skin-friendly comfort akin to a cloud.

拉绒简介

Introduction to hair drawing

极为稀有的拉绒羊绒是羊绒衫金字塔顶上的明珠。

The extremely rare brushed cashmere is the pearl at the top of the cashmere pyramid.

拉绒工艺引自日本，对羊绒品质有极高的要求，只要具备极高的纤维细度以及柔韧度的高品质羊绒才可以被加工成拉绒。

Drawing process from Japan, cashmere quality has very high requirements, as long as there is a very high fiber fineness and flexibility of high-quality cashmere can be processed into cashmere.

拉毛工艺是将已织成的羊绒衫衣片，通过日本水洗工艺，用特质的软水让羊绒绒面出绒。

Brushing process refers to the process of using Japanese water washing technology to remove the fleece from the knitted cashmere sweater pieces using special soft water.

不同于一般的物理性梳理拉伸工艺，用纳米离子工艺改变羊绒分子结构使山羊绒的卷曲度消失变成直线，形成一层均匀稠密的绒毛与传统动物毛皮（如普通羊绒、貂毛等）产品相比,拉毛织物纤维丰满，呈现一种原生态的效果。

Unlike traditional physical combing and stretching processes, the use of nanoion technology to change the molecular structure of cashmere causes the curl of cashmere to disappear and become a straight line, forming a uniform and dense layer of wool. Compared with traditional animal fur products such as ordinary cashmere and mink, the brushed fabric has a fuller fiber and presents a source ecological effect.

相比较常规羊绒，拉毛羊绒不易起球，不易掉毛。

Compared to conventional cashmere, brushed cashmere is less prone to pilling and shedding.

起订量方案

Minimum order quantity plan

最小起订量以及附加费

MOQ&SURCHARGE

色卡内所有颜色最小起订量为1KG/颜色

ALL colors from the color card available with 1KG minimum.

客户打样颜色起订量: 100KG/颜色，100KG以下收取附加费5%

Customer own colors MOQ: 100KG/color, 5% surcharge under 100KG.
