QUICKSAND SERIES YARN

We extract natural color gradients from the shifting moments of dawn and dusk in the desert.

There is Dune Brown, shaped by wind-swept sand dunes, embodying the warm texture of the earth.

There is Mist Silver Grey, shrouded in morning mist, diffusing a cool and sophisticated glow.

One warm, one cool – together they define the layers of wind, sand and light.

Beneath its understated softness lies the texture and warmth of all nature.
